EDUCATION:

University of Tennessee - B.S. Computer Science, GPA – 3.32 Aug. 2018 – May 2022

PROFESSIONAL EXPERIENCE:

Cadre5
Software Engineer Jun. 2022 – Present

- Design, deliver, and maintain secure, high-quality web applications for national laboratories using Vue 3, TypeScript, C#, and SQL, acting as both engineer and technical consultant
- Lead technical discovery for incoming feature requests by collaborating with stakeholders, translating problem spaces into feasible designs, estimates, and implementation plans
- Develop and maintain AI-assisted automated testing workflows, improving test coverage, regression detection, and developer productivity
- Train and mentor engineers on application architecture, tooling, and development workflows

Knoxville Utilities Board
Student Developer Intern Oct. 2021 – May 2022

- Maintain front-facing customer website and customer applications through quality programming techniques using JavaScript and Ember.js and extensive testing with customer experience at the forefront of priorities.
- Execute Agile development of fixes and features and deploy products using the DevOps lifecycle.

U.S. Cellular
Engineering Technical Intern Jun. 2021 – Aug. 2021

- Developed deck of core 5G Stand Alone principles related to the architecture of User Equipment Registration and PDU Session Establishment and presented these processes to the Service Assurance Team.
- Automated Monthly Report readout of Key Performance Indicator metrics as they related to services offered by the organization to provide visibility of network performance. Estimated to save 120 payroll hours per month.

Target Corporation
Food Team Lead Apr. 2018 – May 2021

- Managed a team of 11 Grocery team members that stocked 3500 cases a week and provided great guest service, resulting in daily sales of $20,000.
- Oversaw the operations of Starbucks and led a team of 9 baristas. Ran a 20% increased comp during 2020 – 2021 fiscal year.

Senior Team Lead - Consumables/Leader on Duty Nov. 2017 – Apr. 2018

- Executed Leader on Duty (LOD) functions, which encompassed 70+ Team Members and total store operations.
- Developed and led a 15 member Consumables team – established daily procedures, led them through a store-wide logistics operations shift, and increased department sales by 20%.

Overnight Team Lead – Logistics Jan. 2016 – Nov. 2017

- Led a team of 56, including all management and disciplinary responsibilities, across multiple sites and departments
- Managed $6M in monthly freight, ensured floor inventory availability, and successful store and offsite operations
